Status of the Claims

Claims 1-16 have been presented for examination.

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C: 121:

- I. Claims 1-9, drawn to a method of effecting cell fusion, classified in class 435, subclass 450+ and 173.4, for example.
- II. Claims 10-16, drawn to an apparatus for effecting cell fusion, classified in class 204, subclass 547, and class 435, subclass 285.2 for example.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the electrofusion process could be practiced with other apparatus known in the art and the apparatus could be used any dielectrophoretic process.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

Art Unit: 1651

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
